# **Quarterly Net Revenue Mix by Segment**

#### **Net Revenues**

Net revenues were \$10.78 billion for the third quarter of 2020, 30% higher than the third quarter of 2019 and 19% lower than the second quarter of 2020. The increase compared with the third quarter of 2019 reflected higher net revenues across all segments, including significant increases in Asset Management and Global Markets.

The operating environment continued to recover during the third quarter of 2020 from the impact of the COVID-19 pandemic earlier in the year as global economic activity significantly rebounded following a sharp decrease in the second quarter, market volatility declined modestly, and monetary and fiscal policy remained accommodative. As a result, global equity prices increased and credit spreads tightened compared with the end of the second quarter of 2020.

#### **Net Revenues**

\$10.78 billion

# -Investment Banking-

Net revenues in Investment Banking were \$1.97 billion for the third quarter of 2020, 7% higher than the third quarter of 2019 and 26% lower compared with a strong second quarter of 2020. The increase compared with the third quarter of 2019 reflected significantly higher net revenues in Underwriting, partially offset by significantly lower net revenues in Corporate lending and Financial advisory.

The increase in Underwriting net revenues was due to significantly higher net revenues in Equity underwriting, primarily reflecting a significant increase in industry-wide initial public offerings, and higher net revenues in Debt underwriting, driven by asset-backed and investment-grade activity. The decrease in Corporate lending net revenues primarily reflected lower results for relationship lending activities, including the impact of changes in credit spreads on hedges. The decrease in Financial advisory net revenues reflected a decrease in industry-wide completed mergers and acquisitions transactions.

The firm's investment banking transaction backlog<sup>3</sup> increased significantly compared with the end of the second quarter of 2020, but was slightly lower compared with the end of 2019.

Net revenues in Equities were \$2.05 billion, 10% higher than the third quarter of 2019, due to significantly higher net revenues in Equities intermediation, reflecting significantly higher net revenues in derivatives, partially offset by lower net revenues in cash products. In addition, net revenues in Equities financing were significantly lower, due to higher net funding costs, including the impact of lower yields on the firm's global core liquid assets.

This increase was partially offset by significantly lower net gains from investments in private equities. The increase in Lending and debt investments net revenues was due to higher net gains, reflecting tighter corporate credit spreads during the quarter. The firm's allowance for credit losses was \$4.33 billion as of September 30, 2020.

#### **Footnotes**

1. Annualized ROE is calculated by dividing annualized net earnings applicable to common shareholders by average monthly common shareholders' equity. Annualized ROTE is calculated by dividing annualized net earnings applicable to common shareholders by average monthly tangible common shareholders' equity (tangible common shareholders' equity is calculated as total shareholders' equity less preferred stock, goodwill and identifiable intangible assets). Management believes that ROTE is meaningful because it measures the performance of businesses consistently, whether they were acquired or developed internally, and that tangible common shareholders' equity is meaningful because it is a measure that the firm and investors use to assess capital adequacy. ROTE and tangible common shareholders' equity are non-GAAP measures and may not be comparable to similar non-GAAP measures used by other companies.

The table below presents a reconciliation of average common shareholders' equity to average tangible common shareholders' equity:

	AVERAGE FOR THE
